

Refresh. Restore. Replace.

**Realize repair savings in our
Q1 2024 Price Freeze Edition,
held over from 2023!**

A close-up, high-contrast photograph of a dental handpiece. The handpiece is dark and metallic, with a bright, golden-colored nozzle. A fine, dense spray of particles is being emitted from the nozzle, creating a bright, starburst-like effect against the dark background. The lighting is dramatic, highlighting the texture of the handpiece and the spray.

Repairs are Bowen Product's mainstay... and have been for the past 37 years.

Now—more than ever—it makes financial sense to have us evaluate your existing handpieces. We can either restore them to like-new condition or offer you an excellent replacement option.

We are Bowen, and we know everything about handpieces.

High Speed Preventative Service

Schedule your handpiece repair pick-up online at bowenproducts.com or call us at 1-800-663-2541.

After our inspection of your high speed, we will deep clean the handpiece inside and out, perform a head ream to remove dents, and high-pressure flush the chip air and water lines to remove debris, ensuring 100% flow. Models with push button chucks are tested for proper bur retention and if discovered to be weak, we will advise prior to repairs.

All models receive a new turbine suspension kit, rear gasket where applicable, lubrication, thorough test for proper operation, and 30 day written warranty. Free, no-obligation estimates available.

PREVENTATIVE SERVICE STARTING FROM.....\$95.00

High Speed Canister-Style Turbines

These cost-effective turbines by Sable are specifically made to fit NSK Pana Air, Pana Max, Pana 2000, Henry Schein, Patterson, Champion, and similar styles. Call for other models.

Fittings Kit by Parts Warehouse

This 18-compartment plastic case contains a total of 590 pieces, including common 10-32 fittings, plugs, barbs, tees, washers, and more.

AD-1023 MSRP \$360
IN STOCK NOW\$265.00

We carry a wide variety of bulbs for curing lights, overhead patient lights, and handpiece couplers. Check out the bulbs category on our website.

Handpiece Pressure Gauge

If this test gauge saves just one turbine, it will more than pay for itself on its first use.

Delivery unit gauges are notorious for their inaccuracy. The reading on a test gauge is the only way to accurately adjust drive air on your delivery system. Simply connect to tubing, then attach your handpiece or coupler and let the gauge do the rest. **Now that's resourceful.**

7267 MSRP \$116
IN STOCK NOW\$79.00
PURCHASE WITH YOUR HANDPIECE REPAIR\$58.00
