1987 bowen 2026

ANOTHER BOWEN ADVANTAGE

Save \$40 on each handpiece repair

Include one \$40 discount coupon per handpiece! Send in your handpiece for repair and enjoy instant savings on each one. Don't miss out... quality repairs and big savings await!

Download at bowenproducts.com/coupon

We're a proud B.C. business serving Canadian dentists since 1987... that's 39 years!

Industry longevity

Our 39 years of serving the dental industry means we know a thing or two about handpiece sales and service. We're always available to help, so please give us a toll-free call at 1-800-663-2541... it's free, as is our advice!

Exceptional client care

We're told that we run circles around full-service dealers for phone and email response times. Repairs are typically completed the same day of your estimate approval, and are always shipped via the fastest and safest method possible.

Handpiece repair discount coupon

Our long-standing \$40 repair discount coupon is applicable toward most handpiece repairs and can be used multiple times. Available online, download yours at bowenproducts.com/coupon.

Free, no-obligation estimates

Available for all air-driven high and slow speed handpieces. A \$49 assessment fee will be applied to declined electric motor/handpiece systems.

Repair, warranty, and order history

From 2009 onward, our electronic system allows us to instantly retrieve all repairs, orders and tracking data via your unique Bowen profile. Need information on something older? It'll take us a few minutes, but is always at our fingertips.

Quality parts you can trust

We only use the highest-quality repair parts from fully licensed Health Canada vendors and manufacturers, including Sable Industries. All parts installed in your handpiece are Health Canada licensed and ISO certified. Plus, Bowen adheres to the latest stringent Health Canada MDEL protocols.

With ever-increasing costs these days, it makes great financial sense to have us evaluate your existing handpieces. We could save you hundreds of dollars—or even thousands!—by repairing versus replacing with new.

bowen
WE KNOW HANDPIECES

Bowen's High Speed Preventative Service

Schedule your handpiece repair pick-up online at bowenproducts.com or call us at 1-800-663-2541.

After our inspection of your high speed, we will deep clean the handpiece inside and out, perform a head ream to remove dents, and high-pressure flush the chip air and water lines to remove debris, ensuring 100% flow. Models with push button chucks are tested for proper bur retention and if discovered to be weak, we will advise prior to repairs.

All models receive a new turbine suspension kit, rear gasket where applicable, lubrication, thorough test for proper operation, and 30 day written warranty. Free, no-obligation estimates available.

PREVENTATIVE SERVICE STARTING FROM..... \$99

Sable High Speed Canister-Style Turbines

These cost-effective turbines by Sable are specifically made to fit NSK Pana Air, Pana Max, Pana 2000, Henry Schein C-Type, Patterson, Champion, and similar styles. **Call for other models!**

Why choose Bowen for your next repair?

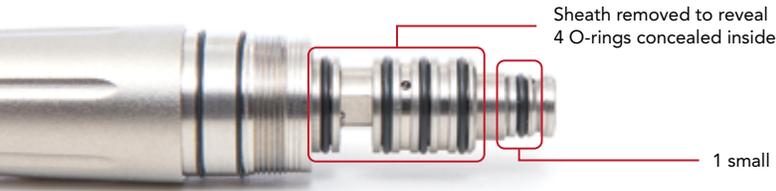

Because with more than 39 years of experience, it means we know a lot about handpiece service and repairs.

We are very, **very** efficient! Reducing your downtime is our #1 priority, so our response time for all phone and email inquiries means the repair process doesn't stall out due to confusing phone menus, auto-attendants, or non-responsive email accounts. We're here—live—five days a week, and always available.

We understand your time is valuable, so we do our best to keep things moving... even after hours, you'll be pleasantly surprised to receive a reply to your email. Typically, your air driven high or slow speed handpieces are completed the same day, or from the date of your estimate approval. **That's the Bowen advantage, and we're proud of it.**

Sable O-ring Kits

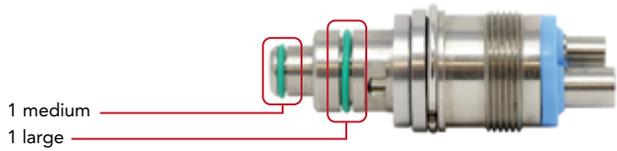

With repeated stresses of heat sterilization and wear and tear from regular use, replace your backend O-ring kits at least every 6 months.

For N-Style Back-End Handpieces

- Contains 1 small and 4 large O-rings
